

# Varied Fluency

## Step 9: Percentages as Fractions and Decimals

### National Curriculum Objectives:

Mathematics Year 5: (5F11) [Recognise the per cent symbol \(%\) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal](#)

Mathematics Year 5: (5F12) [Solve problems which require knowing percentage and decimal equivalents of  \$\frac{1}{2}\$ ,  \$\frac{1}{4}\$ ,  \$\frac{1}{5}\$ ,  \$\frac{2}{5}\$ ,  \$\frac{4}{5}\$  and those fractions with a denominator of a multiple of 10 or 25](#)

### Differentiation:

**Developing** Questions to support representing percentages as fractions and decimals. Uses 100 as a denominator and knowledge of hundredths.

**Expected** Questions to support representing percentages as fractions and decimals. Uses 100 and direct multiples of 100 as a denominator e.g.  $\frac{50}{200}$  and knowledge of hundredths.

**Greater Depth** Questions to support representing percentages as fractions where the denominator is  $< 100$ , 100 or a multiple of 100 and decimals using knowledge of tenths and hundredths.
