## Step 4: Vertically Opposite Angles

### National Curriculum Objectives:

Mathematics Year 6: (6G4b) [Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles](#)

### Differentiation:

**Developing** Questions to support their understanding that vertically opposite angles are equal. Includes 4 angles measured to the nearest 10 degrees.

**Expected** Questions to support their understanding that vertically opposite angles are equal. Includes 4 angles measured to the nearest whole degree; up to 2 angles given per question.

**Greater Depth** Questions to support their understanding that vertically opposite angles are equal. Includes up to 6 angles measured to the nearest whole degree; up to 2 angles given per question.
